Dimetis Sales Services

**Dimetis GmbH** is a German software house which, since 2001, has been supplying the worldwide audiovisual, broadcast and service provider market.

In a context of streams' transport and audiovisual services, our vision is to provide an **operational solution**

- ✓ **to the operators** to know and manage the critical situations but also to streamline the daily operations,
- ✓ **for the company** by offering an optimization of resources and costs, faster return on investment for new projects and quality assurance for the departments involved.

Operationally **our solutions orchestrate and workflow your operations**

- ✓ **If the management of your content and media** is critical, we contribute
  - Collection and distribution of your media files according to defined workflows
  - Analysis and monitoring the quality of the standards of your flows
- ✓ **If the management of your assets and networks** is a subject, we contribute
  - to plan, schedule, provision, supply and bill the connections
  - to orchestrate the physical or virtual services
  - to configure, monitor, control your equipment like codecs, Mux and switches / routers
  - to configure, provision, manage and control your physical or virtual networks
